

Dictionary

PART I

Create an English-to-Spanish, Spanish-to-English dictionary, using the words in the file spanglish.txt. Output both dictionaries to Pd4EdmundLauDictionaryPartOneOutput.txt. Note: you need to change the part highlighted based on what period you are in and who you are.

Input (partial)	Output (partial)
holiday fiesta holiday vacaciones party fiesta celebration fiesta feast fiesta father padre priest padre	ENGLISH TO SPANISH celebration [fiesta] computer [computadora, ordenador] father [padre] feast [fiesta] good [bueno] holiday [fiesta, vacaciones] party [fiesta] priest [padre] vacation [vacaciones] SPANISH TO ENGLISH bueno [good] computadora [computer] fiesta [celebration, feast, holiday, party] padre [father, priest] vacaciones [holiday, vacation]

It goes without saying that you should study the input and output very carefully.

1. How is the input file organized?
2. How is the output organized?
3. Which parts of the output are alphabetized?
4. This is a lab in which choosing the correct data structure is very important. What data structures would be useful?
5. What algorithms do you need? Do some serious planning.

Part II

In this part of the program, give the user the following three options:

1. Ask the user if s/he wants to translate from English to Spanish or from Spanish to English. Then ask what word to look up. If the word is not in our dictionary, apologize. Otherwise give all possible translations.
2. Allow the user to add a translation that is not in the dictionary, let him/her add that translation to our list.
3. Exit the program

The program should continue to run until the user chooses option 3.

Send the current contents of the maps to an output file. Name it as Pd4EdmundLauUpdatedDictionary.txt

NOTE: Make sure the user interface is user friendly and the user knows what to enter (e.g. a text or a numeric value)

What to submit: One java file and two text files (one from part I and one from part II). Make sure you append your program outputs to the end of the Java program.

Sample Outputs

```
What would you like to do today? Select a number:
  1) Search dictionary
  2) Add translation (Part II)
  3) Exit
>> 1
Choose 1 to translate from English to Spanish or
2 to translate from Spanish to English.
>> 1
You have selected the English to Spanish dictionary.
What word would you like to search for (type in all lowercase)?
>> Computer
Sorry, this word is currently not in the dictionary.
What would you like to do today? Select a number:
  1) Search dictionary
  2) Add translation (Part II)
  3) Exit
>> 1
Choose 1 to translate from English to Spanish or
2 to translate from Spanish to English.
>> 1
You have selected the English to Spanish dictionary.
What word would you like to search for (type in all lowercase)?
>> computer
[computadora, ordenador]
What would you like to do today? Select a number:
  1) Search dictionary
  2) Add translation (Part II)
  3) Exit
>> 2
What English word would you like to add?
>> Lau
What is the Spanish translation?
>> Ual
What would you like to do today? Select a number:
  1) Search dictionary
  2) Add translation (Part II)
  3) Exit
>> 1
Choose 1 to translate from English to Spanish or
2 to translate from Spanish to English.
>> 2
You have selected the Spanish to English dictionary.
What word would you like to search for (type in all lowercase)?
>> Ual
[Lau]
What would you like to do today? Select a number:
  1) Search dictionary
  2) Add translation (Part II)
  3) Exit
>> 3
----jGRASP: operation complete.
